

# Computer Aided Dispatch

Clear communication can be the difference between life and death. CAD offers real-time updates, allows users to view multiple calls through tabbed browsing, and enables dispatchers or supervisors to easily assign units to calls, make units unavailable, and place units out of service with only a few clicks. CAD also features a variety of alerts to keep dispatchers aware of any number of situations.

- Manage Law Enforcement, Fire & EMS Units
- Multiple Screen Support
- Agency Defined On Screen Protocols for Events
- GPS Mapping
- Address & Location Alerts
- Emergency Traffic & Officer Distress Alerts
- Active & Archive Event Search
- Location Event History
- Response Time Analysis
- And Much More

**So Your Team  
Communicates  
Clearly & Performs  
at a High Level**
